

TCRFC

T a i c h u n g C o r n e r s t o n e R F C

Official Website Functional Specification

LOCAL ROOTS. GLOBAL PATHWAYS.

Document version v1.9

Date 2026-08-14

Document version: v1.9 **Date:** 2026-08-14 (v1.9 revision: 2026-09-03) **Brand promise:** LOCAL ROOTS. GLOBAL PATHWAYS. **Note:** This is the English edition of *TCRFC 前後台功能規劃書 v1.9*. Section numbering matches the Traditional Chinese edition 1:1.

- v1.9 revision summary**
- 1. The club mark must always be one of the three lockups extracted from `reference/TCR_logo_CMYK.ai` (mark / mark + TCRFC "English" lockup / mark + TCRFC + 台中磐石足球俱樂部 "Chinese" lockup). **Never set the club name in type alongside it, and never add "SINCE" or a founding year.**
 - 2. The Chinese short name is always 台中磐石, never 磐石 on its own.
 - 3. The first-team squad list is **ordered by squad number, with no position grouping or filter.**
 - 4. The homepage stat strip drops the two 2024 figures (founding year, national Division 2 title).
 - 5. Section 10 forms merged from nine to seven (10.2 + 10.3, and 10.6 + 10.7); numbering closes up.
 - 6. TAICHUNG ROCKS FOOTBALL CLUB is a brand slogan, **not the club's formal English name**, which remains Taichung Cornerstone RFC .

Table of Contents

- 1. [Objectives & Scope](#)
- 2. [Site Architecture Overview](#)
- 3. [Public Site Functional Specification](#)
- 4. [Admin CMS Functional Specification](#)
- 5. [Data Model & Content Types](#)
- 6. [Roles & Permissions Matrix](#)
- 7. [SEO / GEO & Multilingual Plan](#)
- 8. [Non-Functional Requirements](#)
- 9. [Delivery Phases & Priorities](#)
- 10. [Open Items](#)

1. Objectives & Scope

1.1 Business objectives

Objective	Corresponding website capability
Build a world-class football-ecosystem website	Full content architecture across the four pillars: First Team / Academy / Women's / Programs
Grow brand influence	News & stories system, TCRFC Culture (manga), Fan Club, official merchandise
Attract talent (players, coaches, students)	Recruitment / trial / registration conversion funnels, International Pathways
Expand international partnerships and sponsorship	Partner zone, sponsorship packages, deck download, B2B enquiry forms

1.2 Five core values (threaded through site-wide visuals and content tagging)

Players First , Excellence , Global Pathways , Community , Integrity

Recommendation: implement the core values as **content tags (Value Tags)** in the admin, applicable to any article / player story / event, so the public site can aggregate content by value.

1.3 System scope

- **Public site:** 13 top-level sections, ~60+ sub-pages, 7 CTA conversion forms, a **Member Centre**, and **two languages (Traditional Chinese / English)**.
- **Admin CMS:** content management, teams & fixtures, registrations & rosters, **member management**, FAQ management, charity impact records, enquiry inbox, merchandise & partners, SEO & site settings, permissions & audit.
- **Out of scope for this engagement:**
 - **E-commerce and payments** — all shopping is routed to **Shopify**. This site builds no cart, integrates no payment gateway, and manages no orders or inventory; it maintains a product showcase and outbound links only (see 3.8 / 4.6).
 - **Technology selection** — this document defines functional requirements only; it does not decide framework, CMS, or hosting.
 - Ticketing, member points, and e-wallet (recommended for later evaluation).

1.4 Existing digital assets

The following assets must be inventoried before launch to determine migration scope and post-launch traffic routing:

Asset	URL	Treatment
Current official website	www.tcrfc.tw	Content migration source: existing copy, news and images to be inventoried and imported; set 301 redirects from old URLs to their new counterparts at launch to preserve SEO equity
Instagram	@tcr_fc_2024	Linked in footer and contact page; recent posts may be embedded on the homepage or news pages
Facebook	TCRFC2024	Linked in footer and contact page; events and news cross-posted
YouTube	@TCRFC-2024	Linked in footer; videos embedded in team pages, match highlights, player stories, manga animations
Women's team official website	Taichung Blue Whale	Outbound target for section 06 Women's Football
Shopify store	TBC	Outbound target for the 08.3 product showcase

Migration principle: inventory and classify existing content first (keep / rewrite / discard), and migrate only what is still current and of sufficient quality. For news, keeping the last 1–2 years is recommended; older articles are not migrated item by item, but their URLs are still redirected.

2. Site Architecture Overview

01 HOME	
└─ 02 ABOUT TCRFC	(2.1 ~ 2.8)
└─ 03 FOOTBALL CLUB	(3.1 ~ 3.5)
└─ 04 TCRFC ACADEMY	(4.1 ~ 4.7)
└─ 05 PROGRAMS	(5.1 ~ 5.5)
└─ 06 WOMEN'S FOOTBALL	single introductory page (no roster / fixtures / results)
└─ 07 NEWS & STORIES	(7.1 ~ 7.8)
└─ 08 TCRFC CULTURE	(8.1 ~ 8.3)
└─ 09 PARTNERS & SPONSORS	(9.1 ~ 9.4 + 2 CTAs)
└─ 10 JOIN / CONTACT	(10.1 ~ 10.7 + map / contact info)
└─ 11 CHARITY & IMPACT	(11.1 ~ 11.4)
└─ 12 FAQ	(standalone section, cross-topic)
└─ 13 SCHEDULE	(fixtures and results by team)
└─ MEMBER CENTRE	(authenticated area, entry point at the right of the header)

2.1 Page-type taxonomy

Type	Description	Admin handling
Main page	Homepage	Modular slot composition (page builder)
Main category	Landing page of each top-level section	Fixed template + editable blocks
Sub-page	2.1, 3.1, etc.	Fixed template + editable blocks
Content / item page	Players, coaches, news, matches, products, manga episodes	Data-driven CRUD (list + detail)
CTA page	The 10.x forms, sponsorship deck download	Form designer + submission inbox

2.2 Global navigation

- **Primary menu (desktop):** ABOUT / CLUB / ACADEMY / PROGRAMS / WOMEN'S / SCHEDULE / NEWS / CULTURE / PARTNERS / CHARITY, with a persistent right-hand group: JOIN (accent button), Sign in / Member Centre , and the language switch 繁中 / EN .
- **Mega menu:** each top-level category expands to show its second level plus one key visual and one primary CTA for that category. Women's Football and Charity are single pages and link directly without expanding.
- **Mobile:** full-screen hamburger drawer (including language switch and member entry), plus a sticky bottom CTA bar (Join the Club / Contact Us).
- **Footer:** four-column sitemap (including FAQ and Charity), social links, sponsor logo carousel, Shopify store link, contact details, privacy / cookie policy, language switch.

3. Public Site Functional Specification

3.0 Site-wide functionality

ID	Feature	Description
G-01	Language switching	Traditional Chinese / English , separated by URL prefix <code>/zh/</code> , <code>/en/</code> . Default is Traditional Chinese; untranslated content falls back to Chinese with a notice ("This page is not yet available in this language"). Switching language keeps the user on the corresponding version of the current page. The architecture must accommodate a third language (Japanese is deferred for later evaluation) without code changes
G-02	Site-wide search	Across news, players, coaches, programs, FAQ, and charity records; supports keyword highlighting and category filtering
G-03	Breadcrumbs	Mirrors the site hierarchy and emits BreadcrumbList schema
G-04	Responsive layout	Mobile-first; breakpoints at 360 / 768 / 1024 / 1440
G-05	CTA component library	Reusable conversion blocks (register / enquire / download) that can be appended to any page
G-06	Social sharing	Facebook / Instagram / LINE / X / copy link
G-07	Cookie consent & privacy policy	GDPR-friendly; tracking scripts load only after consent
G-08	Accessibility	WCAG 2.1 AA, keyboard operation, image alt text, contrast checks
G-09	Newsletter signup	Persistent in the footer, integrated with an EDM platform
G-10	404 / maintenance pages	Branded error pages with links to popular destinations
G-11	Member status bar	Header shows sign-in / register or an avatar menu; when signed in, forms pre-fill basic details; supports one-tap login with LINE and Google
G-12	FAQ quick block	Attachable to the bottom of any page, automatically pulling the FAQs for the relevant topic (see 3.12)

3.1 [01] HOME

Purpose: communicate the brand position within three seconds, then route visitors to the four pillars (First Team / Academy / Programs / Women's) and the two commercial entry points (Join / Sponsor).

Block	Description	Data source
Hero	Video or image carousel (max 5 slides), supporting headline / subhead / dual CTA	Admin banner management
Five core values	Icon + name, linking to 2.3 Our Philosophy	Admin settings
Four-pillar navigation cards	Football Club / Academy / Programs / Women's Football	Static module with editable text and imagery
Latest match block	Next fixture (with countdown) + most recent result	Fixtures module
Upcoming fixtures	Summary of the next 30 days, with <code>D1</code> / <code>U15</code> / <code>U14</code> / <code>U12</code> team quick-filter chips, linking to 13 Schedule	Calendar module
Latest news	Pulls the newest 3–6 items from 7.x; featured items can be pinned	News module
Sponsor logo wall	Carousel ordered by tier, clicking through to 9.1	Partners module
Official store entry	Links to the Shopify store (new tab)	Settings
Bottom CTA strip	Join the Club / Join the Academy / Become a Partner	CTA component

The homepage follows a single line of argument: brand position → match activity → latest news → conversion. Seasonal content (a new manga chapter, a major charity event, an enrolment window) is surfaced through the hero carousel or the latest-news block rather than through dedicated fixed slots.

3.2 [02] ABOUT TCRFC

No.	Page	Public-site functionality
2.1	Our Story	Long-form editor (rich text + mixed image/text + pull quotes)
2.2	Vision & Mission	Two-column vision/mission layout supporting icon lists
2.3	Our Philosophy	Philosophy narrative + expansion of the five core values
2.4	Our People	Person cards (photo / title / bio), groupable (management / coaching / administration), with modal detail
2.5	Governance	Org chart, governance principles, downloadable documents (articles of association, annual report PDFs)
2.6	TCRFC Ecosystem	Interactive ecosystem diagram; clicking a node jumps to the corresponding section
2.7	Club History	Illustrated historical narrative
2.8	Key Milestones	Timeline component (year anchors, images, event descriptions) with year filtering

3.3 [03] FOOTBALL CLUB

3.1 First Team (team code D1)

Throughout the Schedule (13), admin team records, and all filters, this team is identified by the team code **D1**; its public-facing display name remains `First Team`.

Sub-item	Public-site functionality
Team Overview	Team introduction + key visual + headline stats for the season
Players	Player card list (squad number / position / nationality / photo), ordered by squad number, with no position grouping or filter ; clicking opens a player detail page (profile, career stats, appearances this season, related news, video)
Coaches	Coach card list + detail (coaching history, licences)
Fixtures	Grouped by season and competition, showing date, opponent, venue, home/away; sourced from the same data as calendar category <code>D1</code> , with "View full schedule" and "Subscribe to D1 fixtures (.ics)"
Results & Standings	Results list (score, scorers) + league table (maintained automatically or manually)
Achievements	Trophy and honours timeline

3.2 Player Development

Eight module pages: technical & tactical analysis, physical conditioning, game reading, mental resilience, video analysis, IDP (individual development plan), nutrition & lifestyle, education & languages.

- Presented as a **3×3 card grid with expandable detail**; each module contains an overview, training methods, responsible coach, and links to outcome case studies.

3.3 Player Opportunities

- Join TCRFC: eligibility criteria + routing to form 10.1
- Trials: **trial session list** (date, venue, target group, capacity, registration deadline) + online registration
- Foreign Players: English-first version + routing to form 10.4

3.4 International Pathways

- Pathway overview diagram (local → domestic professional → overseas training → overseas club)

- Regional pages: Europe / Japan / Hong Kong (each with partner organisations, success stories, application process)
- International Partners: logo + country + nature of collaboration
- Trials & Scouting: process explanation + application entry point
- Finding Clubs Abroad: service description + consultation form

3.5 Player Stories / Case Studies

- Case list (filters: Academy / First Team / Overseas / Women's); detail pages use a "before-and-after + timeline + video" narrative template.

3.4 [04] TCRFC ACADEMY

No.	Page	Public-site functionality
4.1	Academy Overview	Positioning, training base, headline metrics (students, coaches, progression rate)
4.2	Our Teams	Tabs for U15 / U14 / U12 / other age groups ; each team shows roster, coaches, fixtures, results. The "fixtures" block embeds that team's data from the Schedule (13) directly, with a "Subscribe to this team's calendar" button
4.3	Academy Pathway	Step-ladder pathway diagram (U12 → U15 → First Team / overseas); each stage is clickable for detail
4.4	Training & Curriculum	Five dimensions (technical / tactical / physical / game reading / character), each with a syllabus and periodisation table
4.5	Coaches	Coach list + detail (licences, specialisms, assigned age group)
4.6	Academy Life	Daily training, matches, competitions, educational support, player welfare; image gallery + video
4.7	Join the Academy	Who it's for, selection process (step bar), trial information, fees and information table , online application (routes to 10.2). This page uses the FAQ quick block (G-12) to embed the "Academy admissions" topic automatically, with a "See all FAQs" link (full content in section 12)

3.5 [05] PROGRAMS

Shared mechanism: every course and camp is a **Program Item** record with sessions, venue, schedule, capacity, fees, and registration status.

No.	Program	Public-site functionality
5.1	Children's Training	Level descriptions (mixed-age / beginner / skill development), training venue map , weekly timetable, online registration
5.2	Summer Camp	Who it's for, curriculum, coaching staff, activities, partners, dates and venue , registration (with early-bird pricing and remaining-place countdown)
5.3	Winter Camp	Same structure as 5.2 (shared template and data model)
5.4	Specialist Training	Six specialisms (goalkeeping / forwards / defenders / midfielders / speed & conditioning / advanced), each with objectives, target audience, registration
5.5	School & Community	School partnership packages, community programmes, coach education; includes a partner school list and enquiry form

Registration flow (public site): choose program → choose session → enter student details (multiple students supported) → parent / emergency contact → health declaration and consent → submit → registration number issued → email / SMS confirmation → (optional) online payment or bank transfer instructions.

3.6 [06] WOMEN'S FOOTBALL

Section positioning: this section is a **single introductory page**. No roster, fixture list, results, or league table functionality is built here.

Item	Public-site functionality
Page type	Single content page, composed with the block editor

Item	Public-site functionality
Suggested blocks	① Key visual and headline ② Introduction to the Taichung Blue Whale women's team (history, positioning, significance) ③ Image gallery / video embed ④ A prominent "Visit the women's team website" button (opens in a new tab) ⑤ Bottom CTA
Outbound link	The page's primary action is to route visitors to the women's team official website (a separate site), which owns the roster, fixtures, and results. This site provides introduction and referral only
Not included	X Roster X Coaching staff page X Fixtures and results X League table X Online scholarship application
Admin handling	Managed under B1 Page Management , identical to the 2.x static pages; the women's site URL is maintained in the admin

Consequently, the Team / Player / Match data models serve only the First Team and academy age groups. Responsibility for women's team information rests with the women's website, so this site does not mirror its roster or fixtures — avoiding inconsistency between the two sites.

Women's team official website: [Taichung Blue Whale](#) (provided by the club, 2026-09-01).

3.7 [07] NEWS & STORIES

A **unified newsroom** segmented into eight categories:

Category	Description	Special fields
7.1 Club News	General announcements	—
7.2 Match Reports	Post-match reporting	Linked match, score, line-up
7.3 Academy News	Academy activity	Linked age group
7.4 Player Stories	Personal features	Linked player
7.5 International	Overseas partnerships / player news	Linked country / partner
7.6 Camps & Events	Event previews and recaps	Linked program item
7.7 Community	Community initiatives	Linked partner organisation
7.8 Media	Media resource centre	Press release downloads, brand identity pack (logo / CIS), high-resolution image library, media contact (routes to 10.6)

Public-site functionality:

- List page: category tabs, tag filter, year/month filter, keyword search, infinite scroll or pagination
- Detail page: cover image, publish date, author, body (images / video / pull quotes / galleries), tags, social sharing, related-article recommendations
- Featured pinning (max 3) and a popular-articles sidebar

3.8 [08] TCRFC CULTURE

8.1 TCRFC Manga / Comics

- **About the Project:** origin of the initiative and its world-building
- **Characters:** character card wall + character detail (profile, link to the real player who inspired them)
- **Episodes / Stories:** episode list (cover, episode number, publish date) + an **online reader** (paged and scroll modes, previous/next navigation, mobile gestures); **entirely free, no sign-in required**
- **Latest Episode:** pinned block, also surfaced on the homepage

8.2 Fan Club

- Join the Fan Club: membership form (member details, plan selection)
- Fan Benefits: tiered benefits comparison table

- Fan Events: event list + registration + event recaps

8.3 Merchandise (Shopify referral — no shop functionality on this site)

Item	Description
Positioning	The website acts purely as a brand showcase , presenting product imagery and collection stories; every purchase action (add to cart, checkout, payment, shipping, returns, inventory) is handled entirely by Shopify
Category display	Club Collection / Academy Collection / Fan Collection
Product showcase	Featured product cards (image, name, optional price) + collection story; "Shop now" opens that product's Shopify page in a new tab
Online Store	Primary CTA linking to the Shopify storefront; entry points also placed in the header, footer, and homepage
Data maintenance	Showcase items are created manually in the admin with a Shopify product link (see 4.6 E4). Inventory and price are not synchronised , to avoid inconsistency; the price field should be optional or marked "see store page for current pricing"
Not included	X On-site cart X Payment integration X Order management X Inventory X Shipping and returns

If automatic product synchronisation becomes necessary later, the Shopify Storefront API could be evaluated to pull the product list — a Phase 4 option, outside the current scope.

3.9 [09] PARTNERS & SPONSORS

Purpose: B2B conversion — commercially the highest-value area of the site.

No.	Page	Public-site functionality
9.1	Our Partners	Grouped by type: strategic / international / training / education / brand. Logo wall + partner detail (nature of collaboration, period, link)
9.2	Our Sponsors	Current sponsors by tier (title / official / supporting), sponsorship stories (case articles), sponsorship activation records
9.3	Become a Partner	Six value arguments: why partner, audience analysis (data visualisation : followers, reach, student numbers), brand exposure, social impact, intermediary influence, international reach
9.4	Sponsorship Opportunities	Nine sponsorship package cards : club / academy / team / camp / international programme / manga content / merchandise / fan club / stadium naming. Each covers what it includes, the rights schedule, who it suits, and an enquiry CTA
CTA	Sponsorship Deck download	Gated download form : company / name / email → download link issued (creates a lead record; supports A/B versions)
CTA	Contact Us	Routes to the 10.5 partnership & sponsorship enquiry form

3.10 [10] JOIN / CONTACT

A **forms hub** with seven forms, each with its own fields and recipients:

No.	Form	Key fields	Recipient team
10.1	Join as a Player	Name, date of birth, position, experience, video link, contact details	Football operations
10.2	Academy & Children's Training	Programme selected (Academy U12 / U14 / U15 age groups, or Children's Training mixed-age / beginner / skill-development classes) , student details, preferred venue, parent contact, football background, health notes	Academy / Programs (routed by programme selected)
10.3	Camp Registration	Camp session, student details, health declaration, emergency contact	Programs
10.4	International Player Enquiries	Name (English), nationality, passport, experience, video, visa status	International
10.5	Partnership & Sponsorship	Enquiry type (partnership / sponsorship / both) , company, industry, budget range, proposed collaboration, packages of interest, contact person	Commercial
10.6	Media Enquiries	Outlet, journalist name, topic, deadline	PR

No.	Form	Key fields	Recipient team
10.7	General Contact	Name, email, subject, message	Administration

v1.9 change: former 10.2 (Join the Academy) and 10.3 (Children's Training) are merged into a single form, routed to the Academy or Programs department by the "programme selected" field; former 10.6 (Partner with TCRFC) and 10.7 (Sponsorship Enquiries) are merged into a single form, both already handled by Commercial and separated by the "enquiry type" field. The forms hub drops from nine to seven and the numbering closes up.

Shared mechanisms:

- Bot protection (reCAPTCHA / Turnstile), required-field validation, file upload (CV / video link)
- On submission: auto-reply to the sender + notification to the relevant team + record written to the admin enquiry inbox
- Personal-data consent checkbox (with privacy policy link) and stated retention period

Supporting pages:

- **Location & Map:** multi-venue list (training base, home ground, academy pitches) + embedded map + travel directions + navigation links
- **Contact Information:** phone, email, address, opening hours, departmental extensions, social links

3.11 [11] CHARITY & IMPACT

Purpose: demonstrate the club's **Community** core value in practice, reinforcing brand trust while serving as supporting material for CSR-driven corporate sponsorship (cross-linked with the "social impact" argument in 9.3).

No.	Page	Public-site functionality
11.1	Our Commitment	Philosophy and focus areas (youth support, rural football, disadvantaged families, charity matches), composed with the block editor
11.2	Charity Programs	Program list (cover, name, beneficiaries, period, status: ongoing / completed); detail pages cover the programme's origin, recipient charity name , what was donated , delivery narrative, event photo gallery , and related coverage
11.3	Impact Stories	Timeline / card list ; every record presents three core data points: ① charity organisation name ② what was donated ③ event photography , plus date, location, and a short description; filterable by year
11.4	Our Impact	Cumulative statistics: number of partner charities, total donation instances, areas served; presented as a logo wall / list of organisations with representative imagery. Monetary figures are hidden by default; visibility is decided per item in the admin
CTA	Get Involved	Three participation routes: corporate charity partnership (routes to 10.5) / fan donation (see below) / volunteer signup (form)

Fan donation mechanism

Fans can support the club's charitable programmes directly. Because the site carries no payment gateway, donations are handled through existing channels:

Channel	How it works	Best for
Shopify donation item (recommended primary channel)	List a "support our charity work" item on Shopify with several fixed amounts (e.g. NT\$300 / 500 / 1,000 / 3,000); fans pay exactly as they would for a purchase	General fans, small donations, immediate online completion
Bank transfer	Publish the donation account details on the site with a follow-up form (name, amount, last five digits of the transfer, designated programme, named or anonymous)	Large donations, corporate giving, those who cannot pay online
In-kind donation	A form to register the items and quantities offered; the club follows up	Equipment, kit, supplies

Donation page functionality:

- Explains how funds are used (donors may designate a specific charity programme or leave it undesignated)
- Amount option cards + "other amount"
- **Acknowledgement:** donors choose to be **named or anonymous**; named donors appear on a **public donor roll** (name only, no amounts)
- A thank-you message is sent after donating (email / LINE), and the use of funds is published annually
- Donations by fan members are attributed to their member account and visible in the Member Centre

Note: given no payment gateway is being built, a Shopify item is the fastest route to accepting donations. If formal receipts or tax-deductible status are required later (which involves public fundraising eligibility), the legal and procedural implications need separate assessment — not included in this scope.

Content cross-linking:

- Shares the news library with **7.7 Community**: timely reporting of charity activity is published in 7.7, while the Charity section presents programmes and impact records in structured, long-lived form. The two cross-link rather than duplicating content.
- Cross-linked with **5.5 School & Community**: rural and school football outreach is both a programme and a charitable activity, so it appears in both places.
- Charity programmes can be tagged with sponsoring partners (linked to E1/E2) so that partner pages can show "charity programmes we've supported".

3.12 [12] FAQ

Section positioning: trials, program registration, fees, international development, and sponsorship all attract high-frequency questions, so FAQs are handled as a **standalone, centrally managed section**, with individual pages embedding the relevant topic automatically.

Item	Public-site functionality
FAQ home	Topic navigation cards: <code>Joining the club</code> , <code>Academy admissions</code> , <code>Program & camp registration</code> , <code>Fees & refunds</code> , <code>Trials</code> , <code>International pathways & foreign players</code> , <code>Women's football</code> , <code>Fan club & merchandise</code> , <code>Partnership & sponsorship</code> , <code>Other</code>
Search	Live keyword search (across question and answer text); no-result searches route to the 10.7 general contact form
Presentation	Accordion, with deep links to individual questions (<code>/faq/#q-123</code>) so support staff can send a link to a single answer
Category pages	Each topic has its own page with independent SEO settings
Helpfulness feedback	"Was this helpful? 👍 / 👎 " under each answer, with results written back to the admin for optimisation
Unresolved routing	A persistent CTA at the bottom of each page: contact us (10.7) or the form specific to that topic
Embeddable block (G-12)	4.7 Academy admissions, the 5.x programs, 3.3 trials, and 9.4 sponsorship automatically embed the top five FAQs for their topic plus a "see all" link
SEO	Emits FAQPage schema to compete for FAQ rich results and citation by AI engines

3.13 [13] SCHEDULE

Purpose: bring **every team's fixtures and results** together on one page so fans, parents, and media can follow the club's competitive calendar, and subscribe to it in their own calendar app.

Scope: this section is **match-centric**. Academy courses, children's training, summer/winter camps, and specialist training are **not** in the calendar; their timings and sessions remain on the 05 program pages (see 3.5).

Data sources

Event type	Source module	Displayed	Click behaviour
🏆 Match (primary)	C4 Fixtures	Both teams, kick-off, venue, home/away, score	Go to match detail / match report
📣 Club Event (secondary)	Calendar-native event	Press conference, signing session, fan meet-up, open training, etc.	Show detail or go to the event page

Excluded from the calendar:

Content	Where it appears instead
Children's classes, summer/winter camps, specialist training sessions	Timetable and registration blocks on the 05 program pages
Academy day-to-day training timetables	The 04 team pages; or the Member Centre for enrolled parents
Trial sessions	The trial blocks on 3.3 Player Opportunities and 4.7 Join the Academy (the admin can optionally sync these to the calendar)

Team categories (the calendar's first-level filter)

The calendar is organised primarily **by team**:

Code	Team	Covers	Source data
D1	First Team	League and cup fixtures, results, first-team public events	C1 Team (<code>first_team</code>), C4 Matches
U15	U15 squad	That squad's fixtures and results	C1 Team (<code>academy</code> / U15), C4 Matches
U14	U14 squad	As above	C1 Team (<code>academy</code> / U14), C4 Matches
U12	U12 squad	As above	C1 Team (<code>academy</code> / U12), C4 Matches

Categorisation rules:

1. Every match must be assigned to a **team** (cross-squad friendlies may select more than one).
2. Events not belonging to a specific team are classified as `Club Event` and appear in the "All" view.
3. Once a team is selected, the page header shows the team name and a countdown to its next fixture, and offers that team's **dedicated calendar subscription URL** (so a parent subscribing to U12 does not receive D1 fixtures).
4. The team list is generated automatically from the C1 team records, so **any new squad added later (U18, U10, etc.) appears as a category automatically** with no code change (matching the "other age groups" provision in 4.2).

Terminology: D1 is the First Team described in 3.1 — the same team, not an additional one. `D1` is the site-wide **team code** used for calendar categories, filter chips, and subscription URLs; `First Team` is the public-facing display name used in headings and body copy across 03 FOOTBALL CLUB.

The team list (D1 / U15 / U14 / U12) is therefore the First Team plus the three academy squads from 4.2 Our Teams — covering every competitive team at the club.

Fixture list layout (reference: Manchester United fixtures page)

Reference: [Men's Team – Fixture Listing | Manchester United](#)

Note: that site returns 403 to programmatic fetching. The **confirmed** points below are: ① the page is men's-team-specific, i.e. team is the first-level split; ② all kick-off times are shown in the **viewer's local time zone**, with a note that times may change; ③ the site operates a Match Centre. The remaining specifications follow common practice among professional club fixture pages.

Supporting evidence: Man Utd splits fixtures across Men's / Women's / U21 / U18 tabs, consistent with the `D1` / `U15` / `U14` / `U12` team split proposed here.

Layout structure

SCHEDULE
[D1] [U15] [U14] [U12] ← team tabs
[Fixtures] [Results] ← main tabs
Season 2026/27 ▾ Competition All ▾ Venue All ▾ [Cal]
MARCH 2026 ← month grouping
Sat 15 League TCRFC [crest] vs [crest] Rival
19:00 Taichung Football Stadium · H
[Match info] [Tickets] [+ iCal]

Fixture card fields

Area	Content
Left time column	Weekday + date (large) and kick-off time; displayed in the viewer's local time zone , with a page-level note: "All times are local and subject to change"
Competition tag	League / cup / friendly name with an identifying colour
Match-up	Home crest + name <code>vs</code> away crest + name; TCRFC's side highlighted in brand colour
Venue	Venue name, home/away marker, map link
Status	Upcoming / live / finished / postponed / cancelled (postponed fixtures show the original date)

Area	Content
Actions	Match info , Tickets (if applicable), Add to calendar (.ics) , Broadcast info (if applicable)
Results mode adds	Score (large), scorers, Match report , Highlights

Tabs and filters

Control	Options
Team tabs (first level)	D1 / U15 / U14 / U12 (plus All and Club Events)
Fixtures / Results toggle	Fixtures (future, nearest first) / Results (past, most recent first)
Season	Dropdown, defaulting to the current season, with past seasons available
Competition type	All / League / Cup / Friendly / Other
Venue	All / Home / Away
Month grouping	The list is separated by month headings, with quick month jumps
View toggle	List (default) / Calendar

Public-site functionality

Feature	Description
List view (default)	Uses the fixture card layout above, grouped by month; fixtures nearest-first, results most-recent-first
Calendar view	Month grid with a tag per event; clicking a date expands that day's fixtures
Multilingual	Calendar content supports Chinese / English : team names, competition names, venue names, and event titles must all be maintained bilingually, falling back to Chinese where English is absent
Time zones	Kick-off times are converted to the viewer's time zone with a "subject to change" note, so overseas fans and partners are not misled
Tabs and filters	See the table above; on mobile, secondary filters collapse behind a "Filter" button
Event detail	Side drawer or modal: match-up, time, location (with map link), status, primary CTA
Add to my calendar	.ics download for a single fixture; or subscribe by team (one webcal URL per team plus a site-wide feed; Google Calendar and Apple Calendar stay in sync automatically)
Sharing	Per-fixture share link with an OG preview image (date + match-up)
Member integration	Signed-in users can mark "I'm attending"; marked fixtures are collected in the Member Centre
Reminders	Members can set reminders 1 day / 1 hour before kick-off (LINE / email / on-site — see K4)
Embeddable block	An "upcoming fixtures" block can be placed on the homepage, first-team page, and each squad page, filtering by team automatically based on its host page

Usage scenarios

- **Fan**: switch to D1 → subscribe → every fixture change syncs to their phone calendar automatically
- **U12 parent**: switch to U12 → subscribe to that squad → receives only their child's matches, undisturbed by D1 fixtures
- **Coach / team manager**: switch to their squad → full view of the season
- **Media**: browse fixtures and results, retrieve match report links

SEO and URL rules

- Every public fixture emits **SportsEvent schema** (name, start/end time, location, competing teams, status) to compete for Google's match result features
- Team categories have their own indexable URLs: /schedule/d1/ , /schedule/u15/ , /schedule/u14/ , /schedule/u12/
- Significant fixtures can have dedicated URLs: /schedule/2026-03-15-tcrfc-vs-xxx

3.14 MEMBER CENTRE

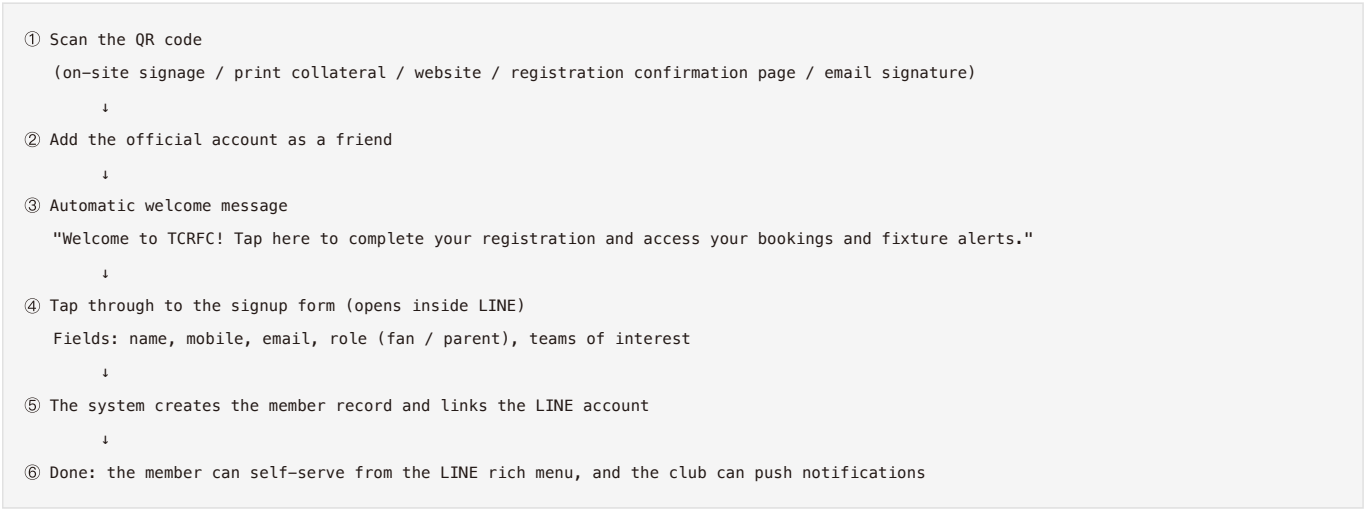

Positioning: use membership to connect four existing scenarios — fan club, program registration, event signup, and newsletter — reducing repeat form-filling and accumulating a first-party contact database.

Three parallel signup channels

Channel	Use case	Description
A. Email registration on the website	Users registering or joining the fan club on their own initiative	Email + password, activated by a verification email
B. LINE Official Account QR code	On-site recruitment, matchdays, camps, school outreach, printed collateral	Scan the QR code to add the official account, then follow the prompts to complete signup and linking
C. Google account	Google-ecosystem users and international visitors	One-tap authorisation creates the account, no password required

All three channels create records in **the same member database**. If someone registers by email and later signs in via QR code or Google, the accounts are **merged into one** by matching on email or mobile number, preventing duplicate records.

LINE Official Account signup flow

QR code placement: signage at training grounds and the home stadium, camps and trial events, recruitment posters and flyers, the website footer and contact page, registration confirmation pages (encouraging signup to receive follow-ups), the fan club signup page, and matchday programmes.

Suggested LINE rich menu items: My bookings , Upcoming fixtures , Program registration , Latest news , Contact us , Official store .

Design principle: the LINE signup form is **deliberately minimal** (name, mobile, email, role only) to reduce abandonment when scanning on site; the remaining details are collected when the person actually registers for a program.

Membership tiers

Tier	How it's obtained	Benefits
Registered	Free registration	Pre-filled registration forms, booking history, newsletter preferences
Fan Club	Joining the fan club (see 8.2)	All of the above + priority booking for fan events, member benefits, exclusive content area
Parent	Linked after completing a program or academy registration	All Registered benefits + student attendance and course information, payment status, notifications

Public-site functionality

Feature	Description
Registration	① Email + password; ② LINE Official Account QR code signup (flow above); ③ quick registration with Google . All three create records in the same member database

Feature	Description
Email verification	Account activated by a verification email after registration (also sent for LINE signups that include an email)
Sign in / out	Email + password; one-tap LINE sign-in and Google sign-in (no password to remember); remember me; failed-attempt limits
Forgotten password	Time-limited reset link by email; LINE-linked members can verify via LINE instead
Linked-account management	The Member Centre shows LINE / Google link status and allows linking and unlinking; unlinking preserves the account and booking history (at least one sign-in method must remain)
Profile	Name, contact details, date of birth, area, avatar, language preference, notification preferences
My bookings	Program / camp / trial / event booking history and status (pending / confirmed / paid / completed / cancelled), with downloadable confirmations
My donations	Donation history and thank-you messages (see the fan donation mechanism in 3.11)
My students	Parents can link multiple students and pre-fill their details when registering
Fan club area	Membership card (member number / QR code), benefits list, exclusive event booking, exclusive content
My calendar	Booked programs and fixtures marked "attending" in one view, downloadable as .ics or subscribable (see 3.13)
Notification centre	On-site notifications: booking status changes, event reminders, club announcements
Subscription management	Toggles for newsletter and notification types; each notification type can be routed to email / LINE / on-site
Account management	Change password, delete account (personal-data deletion request workflow)

Integration with existing modules

- **Forms (10.1–10.7):** when signed in, name / email / phone are pre-filled, reducing the fields to complete.
- **Program registration (P3):** bookings are automatically attributed to the member account, so the admin can view a member's full booking history.
- **Fan club (F2):** fan club members are simply members flagged `fan_club` in the member system — no separate list is maintained.
- **Shopify:** website accounts and Shopify accounts remain **independent**; no single sign-on is implemented. **Member-exclusive offers are handled by issuing Shopify discount codes**, distributed via LINE push or email, with the admin setting the target audience (tier / list) and validity period.
- **LINE Official Account:** serves as a signup channel and notification channel, not as a separate contact database — every LINE friend who completes signup is written into the member database (see 4.11 K5).

4. Admin CMS Functional Specification

4.0 Admin structure overview

```

TCRFC Admin
├─ A. Dashboard
├─ B. Content
│  └─ B1 Pages (static pages / blocks, incl. the women's football page)

│  └─ L3 Categories & display settings
│  └─ L4 Subscription & export (iCal / .ics)

```

Numbering note: the programs module was originally numbered D1–D4 , which clashed confusingly with the **team code D1** (First Team). It has been renumbered **P1–P4 (Programs)**, and all references throughout this document have been updated.

4.1 A. Dashboard

Feature	Description
Action items	Unhandled enquiries, registrations awaiting approval, camps closing soon, sponsorship contracts nearing expiry
Traffic overview	GA4 integration: weekly page views, top pages, traffic sources
Conversion overview	Form submissions, registrations, deck downloads, new member registrations (split by website / LINE source) — weekly and monthly trend charts
Content overview	Articles published this month, drafts, untranslated content count (English / Japanese listed separately)
FAQ overview	Top 10 questions, alerts on questions with negative (👎) feedback
Upcoming schedule	Matches / camps / trials / events in the next 14 days, with exception alerts (no coach assigned, places unfilled, incomplete information)
Quick actions	Publish news, add a match, add a program session, add an FAQ, add a calendar event

4.2 B. Content

B1 Pages

- Covers every static page (2.x, 3.2–3.4, 4.x, 5.x, **06 Women's Football**, 9.3, 11.1, etc.)
- Block editor:** text, image-with-text, gallery, video embed, pull quote, CTA, FAQ accordion, timeline, step bar, stat cards, tables, file downloads
- Each page carries: status (draft / published / scheduled), SEO settings, language versions, revision history with rollback, and a preview link (shareable before publishing)

B2 News & Stories

- Article CRUD, categories (mapping to 7.1–7.8), tags, core-value tags
- Cover image, summary, block-based body, relationships (player / team / match / program / partner)
- Scheduled publishing, featured pinning (max 3), view counts
- Bulk actions: recategorise, bulk publish / unpublish

B3 Media Library

- Image / video / PDF upload with automatic compression, WebP conversion, and multi-size cropping
- Folders, tags, alt text (multilingual), usage tracking (warning before deletion)
- For the media centre (7.8):** assets flagged "publicly downloadable" — press releases, brand identity packs, high-resolution images

B4 Homepage slots / Banners

- Hero carousel management (order, image/video, headline, CTA, display period); **seasonal content (new manga chapters, charity campaigns, enrolment windows) is surfaced here** instead of via dedicated fixed slots
- Toggles and ordering for each homepage block, plus featured-content selection (current blocks: hero, core values, pillar cards, latest match, upcoming fixtures, latest news, sponsor logo wall, store entry, bottom CTA)

B5 FAQ Management

- Topic categories:** create / reorder / disable categories (joining the club, academy admissions, program registration, fees & refunds, trials, international pathways, women's football, fan club & merchandise, partnership & sponsorship, other)
- Question CRUD:** question, answer (rich text with links / images / files), categories (multi-select), sort weight, status (visible / hidden), bilingual versions
- Embedding:** specify which pages' FAQ quick blocks (G-12) a question may appear in, or map automatically by category
- Performance data:** per-question views, 👍 / 👎 counts and ratio; a "low-rated questions" list for rewriting
- Zero-result search terms:** a ranking of searches that returned nothing, used to decide which FAQs to add
- Bulk actions: recategorise, show / hide, CSV import and export

B6 Charity & Impact Records

- Charity Program:** name, cover, beneficiaries, period, status (ongoing / completed), background and content (block editor), **recipient charity** (linked to the organisation records below), **what was donated**, gallery, related coverage (7.7)

- **Impact Record:** three required fields — **charity organisation name, what was donated** (free text, e.g. "50 footballs, 100 training bibs" or "N scholarships"), and **event photography** (multiple images); plus date, location, short description, and optionally the parent programme
- **Charity organisation records:** name, description, logo or representative image, website, contact person, collaboration history; reusable across multiple impact records to avoid re-entry
- **Impact metrics:** custom statistics (name, unit, value, public visibility); **monetary metrics are private by default**
- **Donation settings:** Shopify donation item link, amount options, bank account details, in-kind donation form, donor roll management (named / anonymous, display toggle)
- **Get Involved settings:** copy and destinations for the three CTAs (corporate partnership / fan donation / volunteering)
- Display control: ordering and pinning within the charity section (**no fixed charity slot on the homepage**; for temporary exposure, use the hero carousel or publish a news article)

4.3 C. Teams

C1 Teams

- Team record: name, **team code (D1 / U15 / U14 / U12 ...)**, type (`first_team` / `academy`), age group, season, description, key visual, brand colour, display order
 - **D1 = first_team (First Team)**, of which there is exactly one site-wide; U15 / U14 / U12 and any future squads are `academy`
 - Team codes must be unique — they are the identifier for calendar categories and subscription URLs (e.g. `/schedule/d1/`)
- **Team codes drive calendar categorisation:** teams created here automatically become filter options and subscription sources in the public Schedule (13)
- Supports adding new age groups (matching "other age groups" in 4.2 — adding U18 or U10 later requires only a new record here)
- **Women's football (06) has no team record;** it is managed as a single page (B1). The `women` type is reserved so it can be enabled later

C2 Players

- Profile: name (Chinese and English), squad number, position, date of birth, height and weight, nationality, preferred foot, join date, photo
- Career: history, previous clubs, achievements
- Season stats: appearances, goals, assists, cards (entered manually or aggregated from match data)
- Status: active / departed / on loan / developing overseas (mapping to the Pathways markers in 3.4)
- Relationships: team (across seasons), related news, player stories

C3 Coaches & Staff

- Coaches: name, title, licences (AFC A/B/C etc.), specialisms, history, assigned squad, photo
- Staff (2.4 Our People): group (management / administration / medical / operations), title, bio

C4 Matches

- Match record: season, competition (league / cup), date and time, home/away, opponent, venue, status (upcoming / live / finished / postponed)
- Result: score, scorers with timings, cards, line-up, link to the match report (7.2)
- **League table:** maintained manually or imported from CSV
- **Maintenance approach: entirely manual** (no external league API integration). Both **CSV bulk import** of a full season and single-match entry are provided to reduce data-entry effort

C5 Honours & Milestones

- Honours: year, competition, placing, associated team
- Milestones (2.8): date, title, description, image, whether shown on the timeline

4.4 P. Programs

P1 Programs / Camps

- Types: children's training / summer camp / winter camp / specialist training / school & community

- Fields: name, description, who it's for, age range, curriculum (block editor), coaching staff (linked to C3), partners (linked to E1), images, FAQs

P2 Sessions

- Session: period, weekly timetable, venue (linked), capacity, current registrations, fees (standard / early-bird / early-bird deadline), registration open and close times, status (open / full / waitlist / closed)
- The public site automatically shows "Register now / Join waitlist / Closed" based on status

P3 Registrations

- Registration list: filters (program, session, status, date), keyword search
- Registration detail: student details, parent contact, health declaration, notes
- Status workflow: Pending → Confirmed → Paid → Completed / Cancelled / Waitlisted
 - Payment is handled **offline** (imported transfer records or on-site collection, then marked by staff); the site accepts no payments
- **Member attribution**: registrations submitted while signed in are linked to that member account (K1 can look up all of a member's registrations); guest registrations can be merged later by email matching
- Actions: confirm / cancel, move to another session, add to waitlist, add notes, send templated notification emails
- **Excel export**: roster export (with grouping columns) and printable attendance sheets
- Capacity control: automatic closure when full, waitlist promotion alerts

P4 Trial Sessions

- Backs the trial information in 3.3, 4.7, and 6.3: date, venue, target group, capacity, registration deadline, registrant management

4.5 E. Business

E1 Partners

- Partner record: name (Chinese / English), logo (light and dark variants), type (strategic / international / training / education / brand), country, nature of collaboration, period, website, display order, whether shown in the footer / homepage

E2 Sponsors & Packages

- Sponsors: name, logo, tier (title / official / supporting), contract period, what the sponsorship covers, contact person, **expiry reminders**
- Sponsorship stories: linked articles (7.x)
- Activations: name, date, gallery, results summary
- **Package management (9.4)**: content, rights schedule, price range (can be hidden), and ordering for the nine packages

E3 Sponsorship Deck & Download Tracking

- Upload the deck PDF (multiple versions / languages), configure the download form fields
- **Lead list**: who downloaded, company, timestamp, source page; exportable to CSV with follow-up status flags

E4 Product Showcase (Shopify referral)

- Showcase item: name, category (club / academy / fan), gallery, description, price (**optional**, or marked "see store page"), **Shopify product link**, order, published status
 - Collection copy: brand narrative block for each collection
 - Site-wide Shopify store URL (shared by header, footer, and homepage)
 - Link health checks: periodic detection of broken links with alerts
 - **Not included**: inventory, orders, payments, shipping, returns, coupons (all handled in Shopify's own admin)
-

4.6 F. Culture

F1 Manga Management

- Project settings (8.1 About): world-building page
- Characters: name, profile, artwork, linked real player (optional), order
- Episodes: episode number, title, cover, **bulk upload and ordering of interior pages**, publish date, status, latest-episode flag (determined automatically)
- **All episodes are free to read**, with no paywall and no sign-in requirement
- Readership statistics

F2 Fan Club (events and benefits)

- **Member lists are maintained centrally in module K** (fan club members = members with the `fan_club` tier); no separate list is kept here
- Benefits configuration: tiered benefits table (used by 8.2 Fan Benefits on the public site)
- Fan events: event CRUD, registrant list (can be restricted to fan club members), event recaps (linked galleries and articles)
- Membership plan settings: plan name, period, fee description (payment handled offline or via a Shopify membership product)

4.7 G. Forms & Enquiries

G1 Form Designer

- Create and edit form fields (text, dropdown, multi-select, date, file upload, consent checkbox)
- Per form: notification recipients (multiple allowed), auto-reply template, CAPTCHA toggle, post-submission redirect

G2 Enquiry Inbox

- A unified inbox with tabs by form type (10.1–10.7 + deck downloads + **volunteer signups / donation enquiries**)
- Fields: source form, name, contact details, message summary, source page, UTM source, submission time
- Status workflow: New → In progress → Replied → Closed / Invalid
- Assignee, internal notes, tags
- CSV export, keyword and date filtering
- (Optional) CRM / Google Sheets / Slack integration

G3 Newsletter Subscribers

- Subscriber list, source, status (subscribed / unsubscribed), export, EDM platform integration

4.8 H. SEO & Marketing

Feature	Description
Site-wide SEO defaults	Title template, default description, default OG image, site name
Per-page SEO	Meta title / description / keywords, OG image and text, canonical, noindex toggle
Structured data	Automatic output of Organization / SportsTeam / Event, SportsEvent (schedule) / Person / Article / Course / BreadcrumbList / FAQPage schema
sitemap.xml	Generated automatically (including zh / en hreflang), with the ability to exclude pages
robots.txt	Editable online
301 redirect management	Old-to-new URL mapping with bulk import
Tracking tags	GA4, GTM, Meta Pixel, LINE Tag placement configuration
Internal linking suggestions	Flags orphan pages that nothing links to, based on the site hierarchy

4.9 I. Site Settings

- **Menu management:** primary menu / mega menu / footer menu, drag-and-drop ordering, multiple levels, external links, bilingual labels
 - **Language management:**
 - Enabled languages: Traditional Chinese (default) / English; **retain the ability to add languages** (Japanese deferred for evaluation)
 - **Translation status overview:** a matrix of every content item's zh / en completion status, filterable by "missing English"
 - **UI string table:** bilingual maintenance of buttons, form labels, hints, and error messages
 - Fallback rules: show Chinese or hide the page when a translation is missing
 - Date / number formatting and font settings
 - **Contact information:** phone, email, address, opening hours, departmental contacts, social links
 - **Venue management:** venue name, address, coordinates, travel notes, photos (used by 5.1 training locations and Location & Map)
 - **External service links:**
 - Shopify store URL
 - **Social platforms:** Instagram @tcr_fc_2024 , Facebook TCRFC2024 , YouTube @TCRFC-2024
 - **Women's team official website** URL (for the 06 outbound link): <https://www.tcbw2014.com/>
 - EDM platform configuration
 - **Global settings:** logo, brand colours, favicon, cookie policy, privacy policy, **membership terms**, maintenance-mode toggle
-

4.10 J. System

- **Account management:** create / disable accounts, password policy, two-factor authentication (2FA)
 - **Roles and permissions:** role creation with per-feature permission checkboxes (see section 6)
 - **Audit log:** who changed what, when (create / update / delete / publish), retained for ≥ 12 months
 - **Sign-in log and anomaly alerts**
 - **Backups:** daily automatic backups with manual restore points
-

4.11 K. Members

K1 Member list and detail

- List columns: member number, name, email, tier, **registration source (website / LINE / Google / fan club / program registration)**, **LINE / Google link status**, registration date, last sign-in, status (active / disabled / unverified)
- Filters: tier, status, registration source, **LINE linked or not**, registration period, language preference, newsletter subscription
- **Duplicate detection:** identifies likely duplicate accounts by email or mobile number and offers merging (bookings and links transfer with the merge)
- **Member detail:** profile, linked students, booking history, fan club information, notification history, sign-in history
- Actions: disable / enable, resend verification email, send a password reset on their behalf, add internal notes
- CSV export (permission-gated and written to the audit log)

K2 Tiers & fan club

- Tier definitions and benefit configuration (Registered / Fan Club / Parent)
- Fan club members: join date, plan, expiry, **expiry reminders and renewal notices**
- Member number and QR code generation rules
- Manual tier adjustment (with a reason recorded)

K3 Parent–student links

- Manages parent ↔ student relationships; one parent may link several students, and one student may have several parents
- Link approval (preventing arbitrary linking to someone else's child): matched against registration records or approved manually
- Provides a view of each student's attendance and registration history

K4 Notifications & messaging

- **Three channels:** on-site notification, email, and **LINE push**; each message can specify a channel (or follow the member's preference automatically)
- Audiences: everyone / a tier / parents of a given squad / a given program session / a custom list
- Template management (Chinese / English): registration verification, password reset, booking status change, event reminder, cancelled session, fan club expiry
- **LINE push considerations:** an official account's monthly message allowance depends on its plan, with charges above the quota. Recommended approach:
 - **Routine, personalised** notifications (booking confirmation, cancellations, fixture reminders) go via LINE
 - **Mass broadcasts** (newsletters, campaign promotion) go via email first, to avoid burning through the quota
 - The admin shows **messages used this month and quota remaining**, and estimates consumption before a broadcast
- Delivery records and statistics: delivered count, open rate (email), read and click counts (LINE)

K5 LINE Official Account integration

- **QR code management:** generate signup QR codes, with **multiple parameterised links** per use case (e.g. `summer camp on site`, `school recruitment`, `home matchday`, `website footer`) to track channel performance
- **Channel performance report:** scans, completed signups, and conversion rate per QR code
- **Welcome message settings:** the auto-reply and signup link shown after a friend is added (Chinese / English)
- **Rich menu settings:** menu items and destinations, with different menus by member role (general / parent)
- **Keyword auto-replies:** e.g. "fixtures" returns upcoming matches, "register" returns the program list
- **Link management:** view members' LINE link status, unlink manually, resolve linking anomalies
- **Friends who never completed signup:** people who added the account but never submitted the form are tracked separately with optional reminder messages (within quota); this list **does not count towards the member total**

Member data security requirements

- Passwords stored hashed (irreversible), strength rules, lockout after failed attempts
- Viewing member personal data in the admin requires the corresponding permission, and every view and export is written to the audit log
- A defined process and timeframe for member-initiated account deletion (in line with personal-data legislation)
- Data for minors must be held under a parent account, with guardian consent obtained
- The **LINE link identifier** (a user's account-specific ID) is treated as personal data: never displayed publicly and never included in general exports
- The signup form must state the purpose of data collection and consent terms, to the same standard as website registration

4.12 L. Schedule

L1 Master calendar

- Displays all matches (C4) and custom club events (L2) in a month view, colour-coded by team
- **Per-team swimlanes:** D1 / U15 / U14 / U12 side by side, making each squad's month and any clashes visible at a glance
- Drag-and-drop date changes that **write back to the match record** (triggering notifications on rescheduling)
- **Clash detection:** warns when the same venue or the same squad is double-booked in a time slot
- Filters: team, competition type, venue, status
- View toggle: month / list

Programs, camps, specialist training, and academy day-to-day timetables **do not enter the calendar module**; they are maintained separately in P1 / P2.

L2 Custom events (club events)

- For non-match public activity: press conferences, signing sessions, fan meet-ups, open training, closure notices
- Fields: title (Chinese / English), team (multi-select, or "Club Event"), start and end (all-day and multi-day supported), venue (linked), description, cover image, external link or CTA, public visibility
- **Recurrence rules:** weekly / fortnightly / monthly, with an end date and exception dates

L3 Categories & display settings

- **Team categories:** populated automatically from C1 teams (D1 / U15 / U14 / U12 ...); this screen maintains the public display name (Chinese / English), order, colour, and visibility
- Competition types: names, identifying colours, order for league / cup / friendly etc.
- Public defaults: default view (list or calendar), default date range, default selected team
- Default filters for each embeddable block (which teams show on the homepage, D1 fixed on the first-team page, each squad's own page showing that squad)
- **Whether trials sync to the calendar:** a toggle (off by default, keeping trial information on the recruitment pages)

L4 Subscription & export

- **iCal subscription URLs:** separate webcal feeds for **all** and **each team (D1 / U15 / U14 / U12)**
- Export: matches within a date range to CSV / .ics
- **Bulk import:** a full season of fixtures via CSV (sharing the mechanism with the C4 import)
- Subscription statistics (subscriber count per team feed)

Data consistency principle

- The calendar is an **aggregation layer, not a source of truth**: matches remain owned by the C4 module, and the calendar provides a unified view and editing entry point
 - Only L2 custom events are calendar-native data
 - When a match time or status changes, members who marked attendance or subscribed are notified automatically (see K4)
-

5. Data Model & Content Types

Type	Description	Key relationships
Page	Static page (with blocks); the women's football page is also this type	SEO, languages
Article	News and stories	Category, Tag, Player, Team, Match, Program
Team	Team, carrying the team code : D1 (= First Team) / U15 / U14 / U12 ; unused by the women's team for now	Player, Coach, Match, Season, CalendarEvent
Player	Player	Team, Article, Stats, Pathway
Staff	Coaches and staff	Team, Program
Match	Match	Team, Season, Article (match report)
Standing	League table	Season, Team
Achievement	Honour	Team, Season
Milestone	Milestone	—
Program	Course / camp / specialist training	Session, Staff, Venue, Partner
Session	Session / intake	Program, Venue, Registration
Registration	Registration	Session, Contact
Trial	Trial session	Team, Venue, Registration
Partner	Partner	Article, Program
Sponsor	Sponsor	SponsorPackage, Article
SponsorPackage	Sponsorship package (9 types)	Enquiry
ProductShowcase	Showcase item (display + Shopify link only, not an e-commerce entity)	Collection
ComicEpisode / ComicCharacter	Manga episode / character	Player (inspiration)
FanEvent	Fan event	Member
Enquiry	Form submission (10 types + volunteer / donation)	Form, Assignee
Venue	Venue	Program, Match, Trial
MediaAsset	Media asset	Global
Faq / FaqCategory	FAQ / topic category	Page (embed location)
CharityProgram	Charity programme	Charity, Partner, Article, ImpactRecord
ImpactRecord	Impact record (organisation, donation, imagery)	Charity, CharityProgram
Charity	Recipient organisation (name, description, logo, website)	CharityProgram, ImpactRecord
Donation	Donation record (source, amount, designated programme, named/anonymous, status)	Member, CharityProgram
ImpactMetric	Impact statistic	CharityProgram
Member	Member account, incl. registration source, LINE link identifier , notification preferences	Registration, FanEvent, StudentLink, LineEntryCode
StudentLink	Parent ↔ student relationship	Member, Registration
Notification	Notification / push record (on-site / email / LINE)	Member
LineEntryCode	LINE signup QR code (parameterised, for source tracking and reporting)	Member
CalendarEvent	Calendar event (aggregate view) : points at a Match via <code>source_type</code> + <code>source_id</code> , or is a <code>custom</code> club event; carries <code>team_codes[]</code> (D1 / U15 / U14 / U12) as its first-level category	Match, Team, Venue

Type	Description	Key relationships
EventType	Match / event type (icon, colour, display rules)	CalendarEvent
EventInterest	Member "I'm attending" marker and reminder settings	Member, CalendarEvent

Every type with a public-facing presentation must support **zh / en bilingual fields**, with room to add a third language. `CalendarEvent` should be implemented as a **view or index table** rather than duplicated data, keeping it in sync with its source module and avoiding two sources of truth.

6. Roles & Permissions Matrix

Role	Content	FAQ	Charity	Teams / Matches	Programs / Registrations	Schedule	Members	Business / Sponsors	Enquiries	SEO / Settings	System
System administrator	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full	✓ Full
Content editor	✓ Edit / publish	✓ Full	✓ Edit	Read-only	Read-only	Custom events	—	Read-only	—	Per-page SEO	—
Football / team manager	Draft	Relevant topics	—	✓ Full	Read-only	Match events	—	—	—	—	—
Academy / programs manager	Draft	Relevant topics	—	Academy squads	✓ Full	Squad matches	Parent view	—	Program enquiries	—	—
Commercial / sponsorship	Draft	Relevant topics	Read-only	Read-only	Read-only	Read-only	—	✓ Full	Partnership / sponsorship enquiries	—	—
PR / media	✓ Edit	Read-only	✓ Edit	Read-only	—	Custom events	—	Read-only	Media enquiries	—	—
Support / administration	—	✓ Edit	—	—	Registration handling	Read-only	✓ View / handle	—	✓ Full	—	—
Translator *	Translation fields only	Translation fields only	Translation fields only	Translation fields only	Translation fields only	Translation fields only	—	Translation fields only	—	UI string table	—
Viewer	Read-only	Read-only	Read-only	Read-only	Read-only	Read-only	—	Read-only	Read-only	—	—

Additional rules:

- Content editing follows a **submit-for-review** → **publish** workflow; only designated roles may publish.
- **Member personal data (email / phone / date of birth / minors' details) is restricted:** only system administrators and support/administration staff see it in full; other roles see masked values (e.g. a***@gmail.com).
- **Exporting** member lists requires separate authorisation, and every export is written to the audit log (who, when, how many records, stated purpose).
- * The translator role may edit **en** fields only, and may not modify the Chinese source or publication status.
- **Calendar permissions follow the source module:** which events a user can edit on the calendar depends on their permissions over the underlying match data (e.g. an academy manager may reschedule their own squad's fixtures but not the first team's).

7. SEO / GEO & Multilingual Plan

Implementing each of the nine "GEO & SEO FOUNDATION" fundamentals:

Fundamental	Implementation
Clear site architecture and hierarchy	URLs mirror the site hierarchy, e.g. <code>/en/academy/join/</code>
Keyword-led content strategy	Each page can be assigned a primary keyword in the admin, with usage checks (title / H1 / opening paragraph)
Structured data / schema markup	Automatic output of Organization, SportsTeam, SportsEvent, Event, Person, Article, Course, FAQPage, BreadcrumbList (Product schema is Shopify's responsibility and is not emitted here)
Internal linking strategy	Articles can be related to players / teams / programs, generating cross-link blocks automatically; orphan-page detection
Mobile-friendly design	Mobile-first, touch targets $\geq 44\text{px}$, mobile CTA bar
Fast loading	WebP images with lazy loading, CDN, inlined critical CSS; targets of LCP < 2.5s, CLS < 0.1, INP < 200ms
High-quality original content	Player stories, match reports, manga content, and charity impact records are the differentiating assets
Regularly updated news and stories	Scheduled publishing plus a content calendar view in the admin
Multilingual support	Traditional Chinese / English: <code>hreflang="zh-Hant" / "en" + x-default</code> , distinct URLs, and language switching that stays on the equivalent page

Suggested priority scope for the English edition: homepage, 02 About, 03.4 International Pathways, 04 Academy, 09 Partners & Sponsors, 10 contact forms, 12 FAQ, 13 Schedule.

A Japanese edition is **deferred for later evaluation** and is not implemented here; the data structure and URL rules must nonetheless leave room for it, so enabling it later requires no re-architecture.

GEO (generative engine optimisation) recommendations:

- **The standalone FAQ section (12) is the core GEO asset:** the Q&A format is the easiest for AI engines to extract and cite, so FAQPage schema must be emitted completely
- Give every page a clear H2/H3 structure and an FAQ block, making it easy for AI to summarise
- Present key facts (founding year, squads, venues, contact details, charity impact figures) both as structured data and as explicit text
- Maintain an `llms.txt` describing the site's key content and licensing terms

8. Non-Functional Requirements

Aspect	Requirement
Performance	Homepage LCP < 2.5s (4G), Lighthouse Performance ≥ 85
Compatibility	Latest two versions of Chrome / Safari / Edge / Firefox; iOS 15+, Android 10+
Accessibility	WCAG 2.1 AA
Security	Forced HTTPS, 2FA on the admin, CSRF / XSS / SQL injection protection, upload type and size limits, optional admin IP allowlist; member system : password hashing, session timeout, lockout after failed sign-ins, brute-force protection
Personal data	Registrations, enquiries, and member data (including LINE link identifiers) stored encrypted, with a retention policy and a data-subject deletion process; minors' data requires guardian consent
Availability	99.5% uptime target; daily backups retained off-site for 30 days
Extensibility	Content types must be extensible (new age groups / seasons / program types / languages without code changes); if the women's team is later upgraded to a full team area, the existing team module can be reused directly
Monitoring	Error tracking (Sentry-class), uptime monitoring, alerts on form submission failures

9. Delivery Phases & Priorities

Phase 1 — Brand foundation and conversion (MVP, approx. 8–10 weeks)

- Homepage, 02 About, 03.1 First Team (basic), 04 Academy (4.1 / 4.2 / 4.7), 05 Programs (5.1 / 5.2)
- **06 Women's Football page** (single page, low cost, delivered alongside)
- 07 Newsroom (all categories), 10 Forms hub (all 9), Location & Map
- **12 Standalone FAQ section** (starting with 3–4 high-frequency topics)
- **13 Schedule: team-first categorisation by D1 / U15 / U14 / U12**, fixtures/results toggle, list and calendar views, per-match .ics download
- Admin: content management, news, media library, teams / players / coaches, programs and registrations, FAQ management, master calendar and custom events, enquiry inbox, SEO basics, permissions
- **Multilingual framework** (Chinese content launches first, with English fields and URL structure in place, and room for a third language)

Phase 2 — Commercial, membership, and deeper content (approx. 8–10 weeks)

- The full 09 Partners & Sponsors area (including deck downloads and lead tracking)
- 03.2–03.5 Player Development, International Pathways, Player Stories
- **The full 11 Charity & Impact area**
- 05.3–05.5 Winter Camp, Specialist Training, School & Community
- **Member system (module K)**: email registration and sign-in, **LINE Official Account QR signup and linking**, one-tap LINE sign-in, Member Centre, booking attribution, student linking
- **Advanced schedule**: per-team subscription URLs (webcal), member "I'm attending" and reminders, admin swimlane view / clash detection / drag-to-reschedule
- Admin: business modules, charity module, trial management, advanced registration (waitlists / exports / attendance sheets), member management, **LINE integration (QR management / rich menu / push)**, advanced calendar
- **English content goes live**

Phase 3 — Culture and community (approx. 6 weeks)

- 08 TCRFC Culture: manga reader, fan club (integrated with the member system), **product showcase + Shopify referral**
- League tables, automatic aggregation of player statistics
- Notification centre, newsletter integration

Phase 4 — Optimisation and expansion (ongoing)

- FAQ performance optimisation, zero-result search feedback loop
- Deeper analytics dashboards, A/B testing, personalised recommendations
- Optional evaluations: Shopify Storefront API product sync, ticketing, member points, expanding women's football into a full team area

Note: the phase plan excludes e-commerce and payment development (all shopping is handled by Shopify); that effort has been reallocated to the member system and the charity section.

10. Open Items

Decisions already made

Item	Decision
Technology selection	Deferred; this document defines functional requirements only
Payments and shopping	No on-site e-commerce; all shopping is routed to Shopify
Languages	Traditional Chinese (default) / English ; Japanese is out of scope, with the architecture left extensible
Member system	Required , delivered in Phase 2; signup channels are email registration + LINE Official Account QR code + Google sign-in
LINE Official Account	Already exists — integrate with the current account; no new application needed
Member offers	Handled exclusively by issuing Shopify discount codes ; no account integration
Fan donations	Accepted , via a Shopify donation item and bank transfer (see 3.11)
FAQ	Standalone section 12, centrally managed and embedded across pages
Charity records	Section 11; every record carries three core data points — charity organisation name, what was donated, event photography
Women's football	A single introductory page routing to the women's team website ; this site does not maintain their roster or fixtures
Match data	Entirely manual , no external API integration; CSV bulk import provided
Schedule	Match-centric ; academy courses, camps, and specialist training are excluded. Calendar content must be bilingual
TCRFC manga	Entirely free and public , with no paywall and no sign-in

Still to confirm

1. **Shopify store URL**: the target for the 08.3 showcase and the donation item; if the store is not yet open, confirm the expected launch date.
2. **LINE Official Account plan and message quota**: the monthly push allowance determines which notifications go via LINE and which via email (see 4.11 K4).
3. **Whether donation receipts are required**: issuing formal receipts or supporting tax deductions involves public-fundraising eligibility and regulatory process, and needs separate assessment; this plan covers thank-you messages and annual reporting of fund usage only.
4. **Whether fan club membership is paid**: if so, is payment handled as a Shopify membership product or by offline transfer?
5. **Migration scope for the existing site**: which content on www.tcrfc.tw should be kept, rewritten, or discarded? For news, keeping the last 1–2 years is recommended.
6. **How English content will be produced**: supplied by the club, outsourced for translation, or launched for priority pages first? This affects the Phase 2 timeline.
7. **Whether charity amounts are published**: organisation name, donation content, and imagery are confirmed; monetary amounts are private by default — are there specific cases that should be public?
8. **Whether trials appear in the calendar**: off by default (kept on the recruitment pages); can be enabled in the admin if desired.
9. **Ticketing and broadcast information**: are there ticketing channels or broadcast platforms to display on fixture cards?
10. **Personal data retention period**: §3.10 and §9 both require forms to display a retention notice and for a retention policy to be defined, but **the actual duration is unspecified**. All seven forms need it; it is a personal-data compliance item and must be confirmed by the club and its legal advisers.
11. **Manga release cadence**: the publishing rhythm of episodes, which shapes the "latest episode" block and homepage exposure.

The functionality in this specification can be adjusted and extended to suit actual needs, ensuring the best possible user experience and search visibility.
